

AIRLINE SAFETY

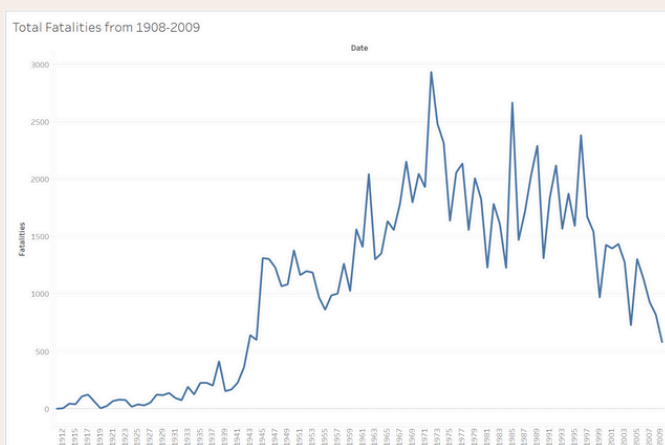

01

Airplanes are the safest form of travel, safer than a car! They continue to get safer and safer each year!

02

The line graph shows that airplane fatalities continue to decrease. Air travel proves to improve in safety.

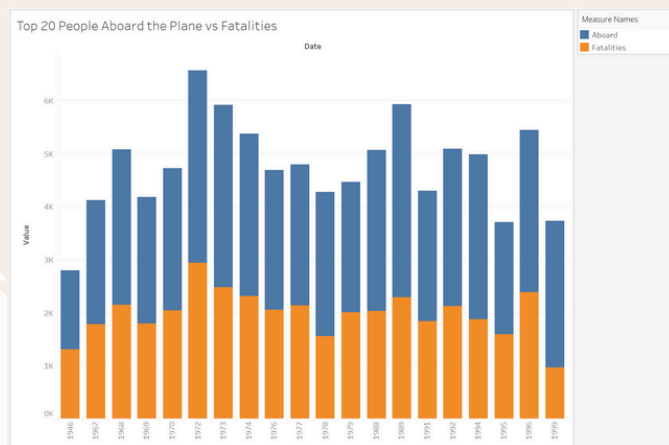

03

Our odds of being in an accident during a flight is one in 1.2 million, and the chance of that being fatal is one in 11 million!

04

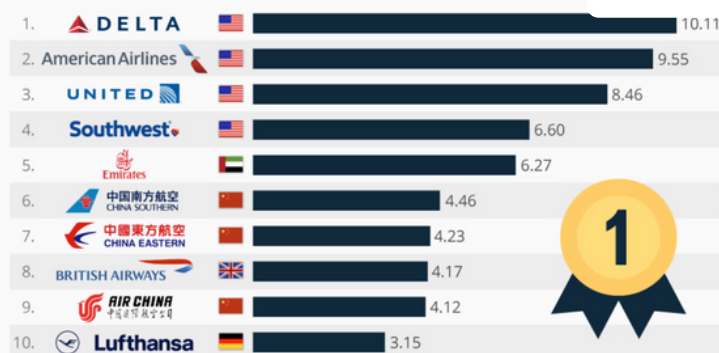

The bar graph shows how you are more likely to survive an airplane crash with the fatalities bar being smaller than the aboard bar.

05

The Most Valuable Airlines in the World

Airline brand value* (in billion U.S. dollars) in 2019

Not only is air travel safe, but Delta prides itself in being the most valuable airline in the world. This title cannot be earned without safety.

THE AIRLINE INDUSTRY PRIDES ITSELF
IN SAFETY AS TOP PRIORITY
